

Objective: Deleting an Event with Registered Attendees

Scenario: You have an Event that you would like to delete from your records. This Event already has people Registered. To delete an Event, the Roster Listing cannot contain any Registrants.

Note: If you attempt to delete an Event that has current Registrations, the "CAN NOT DELETE" popup appears. This intentionally protects you from deleting an Event that has important information attached. This Tutorial will result in deleting both the Event and Registrations. Deleted data will not be retrievable.

Step 1: Click on the Register tab. Find the Event that you would like to delete. Click on the Roster tab. ([Fig. A](#))
