

“Direct Login”

For use when creating a URL that takes your customers directly to the Sign-In Page for a specific event

A URL that leads to a specific event will always contain the following elements:

- A. Page Address (<http://cmetracker.net/>)
- B. Your Publisher Address (YOURABBR)
- C. Action (Login?)
- D. Identify form (FormName=RegLoginLive)
- E. Identify Event by System Event ID (&Eventid=#####)

The address will appear as the one below (substituting YOURABBR for your CME Tracker company abbreviation) for an event with a System ID of 10017:

<http://cmetracker.net/YOURABBR/Login?FormName=RegLoginLive&Eventid=10017>

Note that for a different event you will simply change the Eventid=XXXX to the event id you wish to use.

This address can be used in an email, or on a web page to directly connect to the login for a specific event.
